DETAILED ACTION

Allowable Subject Matter

Claims 1-45 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest a refractive optical unit having a first lens formed of inorganic material and having a refractive surface that produces spherical aberration, the first lens reduces the divergence of a beam of output light diverging from the light source and a second lens formed of plastic and disposed in the beam of output light, where the second lens compensates for the spherical aberration introduced by the first lens. A positive lens or collimating lens will essentially reduce the divergence.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
